Practical by design

Qore has the ability to respond to the needs of an entire organisation making it a unique proposition, fulfilling a wide spectrum of demands, both practical and aesthetic and it does so with an attention to detail that our designers have honed from great experience.

Your system configured for you

The Qore system is designed to be configured to your exact needs. Start by choosing from a range of legframe options and continue to create a solution to match your organisations exacting requirements by choosing worksurfaces, screens, cable management, accessories and storage.

1. Leg Style

Qore desking accepts a selection of four leg options available in multiple colours to create a unique look. The rectangular shared leg option replaces two leg frames to reduce components and physically joins two desks together in linear runs. The shared leg can be used in combination with all desks.

2. Worksurface

Available in a large range of desktop shapes, sizes and finishes. Qore offers a footprint for any application or budget and helps you to create your own unique environment.

3. Screen

Screens can be fixed to the workstation by 2 brackets bolted to the rear of the desk top and are available in two heights, offering different degrees of privacy. Screens are available in Fabric and MFC to compliment the worktops.

4. Cable Management

Cable management uses an innovative hinged wire basket mechanism that simply clips into place. Leg mounted and flexible cable risers supply power from floor positions to offer a fully cable managed solution.

5. Accessories

Multiple screen and worktop mounted accessories are available. Screen and desk mounted monitor arms combined with under desk CPU cradles help to keep the worktops clean and helps to adopt a comfortable sitting posture.

6. Above Desk Storage

Qore offers a storage solution for every need. Unique third level storage optimises floorspace with shelf or lockable box options, while standard Tangent Storage also integrates seamlessly with the Qore system.

Your office your work-style

However you work, Qore can be adapted to suit your organisation's exact work-style. Qore provides cost effective solutions for every office type from open plan benching to cellular and trading office configurations

Your technology taken care of

Integrating your IT requirements to Qore's adaptive platform is easy. Cable management, PCs, monitors and much more can be easily accommodated within the system, making Qore more than just a desk.

Cable management uses an innovative hinged wire basket mechanism that simply clips into place.

Desktops come with a unique cable port/fixing point with a hinged flap keeping cabling tidy and also serving as the fixing point for shelf support poles or monitor arms.

Modesty Panels can be assembled directly under the top or with a large gap to give greater access to horizontal cable management.
