

The benefits of standing

The human body has evolved for movement so it follows that the freedom to alternate between sitting and standing at work can help maintain both physical and mental health

Research shows that the freedom to alternate between sitting and standing boosts productivity and improves well-being by allowing the office worker to choose the best posture for the task

Electric Height-adjustable Desks

The Risks of Sedentary Work

The office is the engine of the 21st century. The typical office worker can spend a large part of their working day seated and research shows that this can pose serious health risks. Many now consider sedentary work to be the new smoking. Standing all day poses risks of its own, therefore alternating between sitting and standing will help reduce risk, promoting good health and wellbeing at work.

EDF0 Electric Height Adjustable Desk Features

Advanced Control

- Responsive and easy to use which encourages alternating between sitting and standing
